SOURCE EVALUATIONS ARE DEFINITIVE APPRAISAL OF CONTENT IS TENTATIVE.

1. [redacted] three large dredgers were engaged in excavating off the Rostock maritime harbor entrance. [redacted] the channel between buoy 7 and the harbor entrance, as well as the fairway in the harbor area, were to be deepened up to 12 meters, to permit the new 10,000-ton East German vessels to put into Rostock harbor. The new channel off the eastern shore is to be excavated first to 6 meters and then to 12. Dredging east of the old entrance has been intensified. It is to be completed in 1958.
